

**You can use yards or meters.**

Write your score and in notes you can write for example the number of putts as shown in the picture. If you write an x followed by the number of putts mean a chip and number of putts. So: x2 is a chip and 2 putts.

In notes you can write some additional information you find suitable to know.

**APPROACHES & PAR 3**

The inner circle symbolizes a 6-meter diameter around the flag so if you are inside of 3 meters from the flag you mark inside the small circle.

The larger circle has a diameter of 20 meters so its 10 meter to the flag. If you are outside you can mark it outside the circle.

Are you outside the green and Chip / Pitch the ball and use 1 putt you register it and fill in the statistics after the round.

*You can off course use different measurements on the circles but use the distances over a period of time so the statistics gets true. When the ball land on the green or just around you make a dot and write a 7 (for a 7-iron) a dot and PW is a pitching wedge, a 4wood is a dot followed by 4w.*

**TEE SHOTS**

Here you can also draw a shape off the ball flight, distance and were it lands. The centre line doesn't have to be the middle of fairway it is where you aim. If you use a spoon or a 5 wood from the Tee you mark it 3w or 5w. After each round you fill in the statistics in General Information.

**GENERAL INFORMATION**

Greens in regulations

Fairways in regulations

Sand saves (up and down from the bunkers)

Up and Downs (is used from 100 meters and shorter, followed by a 1 putt)

Total Putts  
 3 Putts  
 Single putts

In NOTES under general information you can write things like Rain, Wind etc.  
**Fill in these and after 6-8 rounds you start to get a picture of what to do!**  
**You can take a print of the pages and start to use it. If you need future help you are welcome to contact m**
